Professional Experience

Discord Bot and Website Developer (Freelancing), *Point Of View (POV)*
12/2023 – present
Hyderabad, India

- **Project:**
  - Developed a custom Discord Bot using Python which handles tasks from server moderation to playing music in voice channels.
  - Bot mainly uses modules such as Nextcord, PyMongo, PyNaCl, Threading, JSON, Asyncio and Motor.
  - Developing a website using AngularJS for Front-End and Django for Back-End to manage and configure this bot remotely, in real-time.

Front-End Developer, *Calsoft Technologies*
03/2023 – 10/2023
Bengaluru, India

- **Project-1:**
  - Developed and maintained the Front-End part of a website using AngularJS which also had a mobile application developed by my team using Kotlin.
  - Helped in the development of the mobile app after learning Kotlin as well.

- **Project-2:**
  10/2022 – 02/2023
  Bengaluru, India
  - Developed and tested APIs with my team for a client's website using Mulesoft and it's tools.
  - Developed the Front-End part of the website using AngularJS for the client.
  - Learnt Mule Expression Language to develop the API's and also learnt how to use tools such as Anypoint Studio Platform and Mulesoft Cloud to test and deploy the API's.

- **Project-3:**
  10/2021 – 09/2022
  Bengaluru, India
  - Developed and maintained a website with my team for in-house purposes using JavaScript and it's frameworks, mostly AngularJS.
  - The implementation of the website streamlined the process of hiring for the Talent Acquisition team.
  - Given role was to build the Front-end part of the website using AngularJS.
  - Rolled updates for the Front-End part later on, which made major overhauls to the website as per client's request.
  - And then later on switched to using ReactJS as per company's requirements while working on the same website.

Personal Projects

Attorney Appointment Scheduling System, *University Project*
03/2021 – 05/2021

- Led a team on a University project to develop a website using Django.
- Learnt HTML, CSS and Python.
- Also implemented the usage of Git & GitHub to increase our work efficiency.
